Sustainability Efforts

KITCHEN GARDEN

We want to add fresh vegetables to the girls diet.

The girls normally eat ice, beans, ugali (cornmeal) and cabbage. Rice is expensive so they only eat this about once a week. The garden would help expand their diets!

FENCE FOR NEW GARDEN

A new fence will keep out any unwanted livestock.

\$ 148

Live stock could eat the freshly planted garden and even wander into the classroom!

TOOLS SEEDS AND LABOR

Tools and seeds are needed to create the garden. Labor will be hired to build the fence and help prepare the garden.

\$262

Wood is also needed for plots so that the girls can grow their own veggies.

WATER AND PLUMBING

This is a project for the future!

\$ 122

We want to be able to take grey water from the showers to be able to water plants and the garden.
